MEMORANDUM

To: All Hospitals in Region 6

Date: 05/27/2025

Subject: Triage Tag Day

Region 6 Triage Tag Day

October 15, 2025

July 15th is the Region 6 triage tag day. The purpose of this exercise is to test the MCI triage tag/ triage tape or ribbon process for EMS and hospitals.

What is required of you?

1. Please leave the triage tag on the patient until they are discharged. **(Unless this hinders patient care)**
2. If the patient is going to be transferred **by ambulance** to another hospital, facility or home, please leave the triage tag in place.
3. EMTrack notifications will include a triage tag number along with normal information. The EMTrack will indicate “**Exercise**” during triage tag day, unless there is a real MCI event.

What do I tell my patients if they have a question?

You should explain to the patient that this is part of an exercise to be better prepared for disaster response. The triage tag will not change their treatment in any way.

What is the time frame for this event?

The exercise begins on October 15 at 0700 and ends on October 16 at 0700.

If you have any questions, please contact your supervisor.

Please use the QR code to submit feedback about triage tag day (The QR code is clickable in electronic format).
